

A5 Ward
The Royal Hospital Haslar
Gosport
Hants

PO12 2AA

12th April 2000

Dear Sister/ Nurse in Charge,

Thankyou for accepting this gentleman back into your care.

Mr. Ripley was admitted to us on the 09/04/2000 via the Accident and Emergency department, on examination it was felt that he may have had a small CVA or be suffering the effects of excessive MST administration.

CVA was later excluded, his altering levels of consciousness were attributed then to the latter and a degree of dehydration.

His current medications are;

Baclofen 10mg TDS,
Enalapril 40mg od,
Lacidipine 2mg od,
Cisapride 5mg TDS,
Lansoprazole E/C 15mg od,

Frusemide 40mg od,
Co Danthramer 25/200,
Multicalcium od,
Paracetamol 1g QDS.

Mr. Ripley has remained self caring throughout his Hospitalisation. Please do not hesitate to contact A5 ward if you have any further queries, he's now discharged from our care back to his GP.

Yours Faithfully
