

Code A

15th Dec

Dear Sir/Madam

I write to put in an official complaint regarding the treatment – or lack of treatment my husband received whilst a patient in Queen Alexandra Hospital recently.

I have sent the complete 'diary' of events to **Code A** - Room 102
Management Centre
St Mary's Hospital

I have given her permission to show it to you rather than have to copy it all out again.

I should very much like to see somebody regarding this whole affair. Even my district nurses have been shocked by the state of my husband and have taken photographs of his bedsores for their own report.

I am very angry at the way my husband was dealt with, and also the immediate family. We could get no information at all from the ward F4.

Yes, I discharged him. If I had not how long would it have been before staff noticed he was not eating, and had dreadful bedsores. I am too angry to write all this down, it would be better if you read my report which I sent to **Code A**. I am considering getting the National Press involved.

Yours faithfully

Paule Ripley (Mrs)
