Presumably Mr. Horsley has seen the original Livesley and Ford opinions or he can get them - as long as reference is made to them quite strongly at the inquest using the GMC Ford witness statements and cross examination and reference to the paper circulated by the police with extracts from Livesley's report – do we need the actual Reports. Mr. Horsley will recognise we are aware of the contents – we know he is keen on a public inquiry at least and he can write up his recommendations to the DPP after the inquest. I think he is well aware that I am not going to keep quiet – but if all the evidence is presented at the inquest could that jeopardize a possible criminal case or public inquiry ( not just for my case). I am going through the recommendations in the Coroners and Justice Act 2009 with a fine toothcomb. Gillian PS. Hope you have taken some action regarding the rumour and contacted Lesley.
