Subject: Missing Statements -Error

I now note there is reference to a Statement of [Code A] given to Prof. Livesley from the Police (DCI Burt 19 July 2000) – there is no trace of this statement or even interview notes in the disclosures. The query remains regarding Staff Nurse Brewer – no trace of the statements of 3 September 1998 and 9 September 1998 , 7 pages, taken by Mrs. Hutchings , Investigating Officer Portsmouth Healthcare Trust and copies given to Prof. Livesley. Am I to understand no interviews or statements were taken by Hampshire Police ? Nurse Brewer was very much “involved”. I allege that it was Staff Nurse Brewer who gave haloperidol to my mother half an hour before my mother was found on the floor 13 August 1300 hours (with a dislocated hip). Haloperidol had been prescribed at the Glen Heather’s Nursing home for a good night’s sleep and Barton has written it up “if noisy” It is mentioned that same day hip “internally rotated” Gillian M Mackenzie
