When is someone going to ask how many people made a complaint to the Health Authority at the time of death and how many went to the police before 2001 – just who and for how long had the “ families who have been fighting for 10 years sat on their “chairs” until that word “compensation” came into the public arena with Shipman ? I certainly had it quoted to me by a “family” that the compensation could be in telephone numbers. I despair - or is there something in the Gosport water ? Gillian
