informed them that he would 'be made comfortable' and that they could 'come and see him in the morning'.

Around midnight the hospital contacted the family to inform them that John ABBOTT had died.

The family are concerned that their father was given medication that was too strong and as a result he died.

Mr ABBOTT was cremated.

ended the home address of Mrs GILMORE at 1000 hrs on Thursday 27th November 2003 (23/11/2003) in relation to her father, Victor ABBOTT, as per the policy log. Also present were her husband and brother.

I discussed the nature of the family's initial concerns as per officers report 7E.

They felt that all of the relevant points had been covered and were given a copy of their father's medical records.

The family is happy to be notified by letter in 'layman's terms' but would like to have the opportunity for a follow up visit if they feel they have questions.

Expert Review

Victor Abbatt

No. BJC/01A

Date of Birth:

Code A

Date of Death: 30 May 1990

Mr Abbatt was admitted to the Gosport War Memorial Hospital on 29 May 1990 as an emergency. Dr Barton requested this as his wife could no longer cope with him at home.

On admission he was diagnosed as having a chest infection with mild heart failure. He was noted to be cyanosed by the nursing staff when they put him to bed at 21.20 on the day of admission. He was then administered 10mgs Temazepam apparently which had been written up for him.^{VAI}

The experts criticised the use of a small dose of Temazepam in a patient who is cyanosed. They note, though, that Mr Abbatt was already very unwell.
