

Meeting by Jane P  
on 18 Sept on telephone.

Dossier.

In relation to a series of cancers that some of nurses raised - did not feel their (their copies of the correspondence) cancers were being dealt with very well by Dr 1 & Isabel Evans (hospital).

Initially tried to raise it with DR 1 whose reaction was that of 'I know but' then considered by G.M.H. & Dr. 'Tricklewaters'.

Several times went to Isabel Evans to express concerns.

1st meeting (as in dossier).

more to feel DR was NOT medical but nursing issue - New lack of knowledge (need training etc) had training but still felt - concerned. - then meeting with staff & community (Mrs Geraldine Whitney). Then back to Isabel Evans who was not happy with them. Factors in the ward - day staff not happy with them - I frankly ostracised them.

2nd meeting. felt stimulated.

Logan Evans. Barbara Handly & staff. after that felt nervous etc to go. Not aware of any policy produced. Nurses seemed to improve slightly & then the client mix changed & they felt more able because of new training NOT to administer drugs. Did not record it. everyone afraid to use syringe drivers.

## Dinner Cant

When they stopped making a list? They were brought back into the fold.

Did not know about the complaints as they were on nights.

Might someone would come to them?  
Cm.

questions were never asked - so they could not say.

finally when press report said 'no nurse has ever challenged' & they knew they had.

Everyone named in meetings has copies.

not going to press

'whistleblowers'
