Linda saw this story (x 2) on the BBC News website and thought you should see it. (set out immediately below this email)

Please note that the coroner withheld Prof. Ford's report which positively confirmed the medics criminality.

Carmel's coroner actually withheld the main third party independent evidence in her case from the jury, to prevent them from considering a verdict of unlawful killing, thus avoiding formal referral to the police.

The coroner's action is far more serious than simply and inappropriately "cherry picking the evidence". It is a flagrant attempt to pervert the course of justice and a criminal offence.

Also, this 'Spanish Practise' cannot be allowed to continue as it is both unlawful and certainly not in the public's interest.

Kind regards,

Bernard Bloom

**** Drugs led to deaths of patients ****

Three patients who died at a Hampshire hospital in the late 1990s were given the wrong medication, an inquest jury rules.
