Subject: Re: LH Statement - Table 'LFH 1'

Dear Mary

I will not be able to update my statement before the meeting tomorrow (which I hope to attend). I have only just received Benita's comments and I want to talk to [REDACTED] before making any further changes.

This started out as my statement from memory with a little help from a couple of key documents but I am concerned that it is turning into something else - a collective review rather than an individual statement?. Perhaps that is a better way forward but we need to be clear what we want to produce and how it can best be packaged. All comments about my personal statement are welcomed to help ensure clarity but I am not willing to singularly put my name to a collectively developed document.

I never intended my statement to be viewed as a definitive summary of what happened, when and what action was taken it was only intended to give a broad overview - with Benita's comments perhaps it would be better to use my statement as the basis for a more comprehensive statement from the PCT and PHT?.

Hi Lesley and Neil

I have just gone through Lesley's statement, and realise that Benita's comment about the attached table referred to in paragraph 92 still hasn't been received. If you get this email in time to send me a copy today, I will be able to take copies to the steering group meeting on Monday.

Thanks in advance for your help.

Regards
