Questions extra
 Uses of information

4) Rachael should be able answer this it has certainly become much wider but there are problems with Haslar.

5) I have asked for three practice plans to be copied and anonymised that have amongst other things requests for training, they may be useful anyway

6) We have provided corecare for GP docs as a result of the GP involvement in Gosport War Memorial the knock on to other GPs was quite stressful as some GPs received some vitriolic comments about not being very trusting of the care provided

6) No clue

7) Cannot think of any not sure if Jenny Dock at training Dept. St James could help.

Margaret

4/ Path Link Pilot - if no joy, shared
 IT services will know. (STH)
 I can phone if no joy from Inger.

6/

6/ Path links could be classed as
 effective use of info to help review
 pts. more effectively.

Templates for chronic disease
 management in practices helps
 improve the management of pts
 and helps to review them appropriately.

PRIMIS project has helped to
 standardise data in primary care,
 so helping provide ~~the~~ consistent
 coding and improving ~~the~~ recall of pts.
 Has also helped to identify gaps where pts

do not appear on disease registers.

71 Permis Project as well
as the training & Dev. prog. from
Jenny Dock
