

symptoms settled. - R.H. Hester.

On examination at that time - no masses, no guarding,
tender around ~~the~~ outer abdominal wall.
No icterus, or pyrexia. Bowels normal, unobstructed.

I was asked to visit as his symptoms
persist although less severe.

He is bringing up bile. Bowels not open
for 5 days.

POE Looks distended up to umbilicus.

Bowel sounds normal

R.H. Empty rectum.

Tender both flanks & over G.B.

He is a w.i.d. with Hypertension on
Monocor Syze, Cryspride 1000, Gastrocax Co-Prox. P.O. Smith
