

symptoms settled. - R.H. Hester.

On examination at that time - no masses, no guarding, tender around ~~the~~ outer abdominal wall. No icterus, or pyrexia. Bowels normal, micturated.

I was asked to visit as his symptoms persist although less severe. He is bringing up bile. Bowels not open for 5 days.

OK Looks distended up to umbilicus.

Bowel sounds normal

R.H. Empty rectum.

Tender both flanks & over G.B.

She is a w.I.D.D. with Hypertension on Monocor Syge, Cerepride 1964, Gasterocin & Co-Prox. P.P.S. 1965
