Dear Briony Mills,

Further to my telephone conversation, I now understand that the CHRE has agreed to undertake a full review of the 'fitness to practice' hearing of Jane Barton.

I would request that your urgent review takes into account, not only the transcripts and evidence of both the GMC hearing and the coroners inquest, but also takes account of the vast amount of unused evidence, that to date the police have been hiding away, including the elusive "Baker Report". ( The death audit).

I believe that as part of your review you should also take account and indeed interview each of the expert witnesses that were used in all of the police investigations, their written reports are all available from Hampshire police ( except of course the elusive "baker report").

I also feel that your review, considering the guilty findings of the panel, and the seriousness of those charges, should take into account the other 82 deaths that were part of the police investigations and indeed the 3000+ by her own admission that she may have been involved in.

I believe that then, you will be able to give, as Timothy Langdale QC said, 'an informed decision' and not one based on the 'media hype'

I believe also, you will realize just how ridiculous the conditions that were put upon her are, given the seriousness of the charges to which she is guilty.

Multiple 12 ? serious professional misconduct charges, that have all led to the premature death, of an old and vulnerable person.

These charges were, as the chair of the panel said, proved to a criminal standard, i.e. ' beyond reasonable doubt'.

With regard the 184 testimonials that Timothy Langdale QC sneaked in. I'm sure that Shipman himself could have come up with at least that many testimonials, had he been given like Barton, a further 10 years to practice his skills. These are not worth the paper they are written on and have absolutely no bearing on her past actions, therefore I believe in your review you should totally disregard them.

Having once reviewed all the evidence, I feel it is your duty to refer this matter to the high court, with a recommendation that the panel's decision be overturned and this doctor be erased from the medical register, out of harms way, forever.

I believe it would also be your duty, as a public body, to hand all your findings to the police, with a recommendation to bring criminal charges against this doctor.

On a personal note, and with your insight into the tragic events at this hospital under Dr Barton, I would ask that you contact your own MP requesting that he supports and signs the early day motion EDM 691

'Deaths At Gosport Hospital'. Help us to get the full public enquiry that my father deserves.

I look forward to your early reply.

Iain Wilson.
