There is an error in the return in that we do use GPs to provide some on-call cover for medical not psychiatric issues.

I can find no evidence to support the fact that any of the predecessor organisations F&G/EH provided this for the mental health wards. However we do have established links to GP practices by CPN and have over the last years proactively worked on engagement and every GP surgery has been visited by the Consultant and CPN for that patch.

Sarah Garland the new Modern Matron has developed a comprehensive action plan (based on the existing ward development plan) to address outstanding CHI issues and other emergent themes.

Please also be advised that we have a POVA meeting scheduled for January for Daeadalus ward as a result of one of our ongoing investigations.
